Alerting Abstract ...a manpower registers intention to receive a manpower futures and public relations data on a **web** server of a personal history **manager** or the corresponding enterprise. A personal history subject which desires an employment clarifies the existing...
...and registers the intention to get a relation of a personal history communication on the **web** server. The enterprise received the manpower futures sale intention indicates the intention to purchase the...

...the predetermined limit of employment number. After the manpower futures trade, the enterprise presents an **education** until the employment, a guideline of **learning**, and object economy data including the corresponding enterprise to the manpower futures and gets the personal history communication in order to induce the **learning** and an **educational** specialization. The enterprise **forms** a pure manpower future **pool** specialized to one's enterprise by updating periodically the future **pool** according to a predetermined standard.

Original Abstracts:

An apparatus (see Figs 1A/1B/1C) and a method **implement** , **manage** ,
and

track **online** digital transactions via an **escrow** , including opening,
servicing, real-time or near real-time status of the broker, title company,
lender, vendor, buyer and seller, and closing of an **escrow** via a medium
such as the **internet** (210). Multiple access methods are employed. The
present invention provides computerization and **internet** type process
implementation for **escrow** processes including, but not limited to,
digital transaction coordination, digital status coordinators, **escrow**

transactions, **on - line** digital signatures, video signature authentication, wireless transmission of **escrow** transactions, voice digital **instruction** , set-top/ **Web** TV digital **escrow** transmission. The system includes data, application, and servers along with supporting LAN or WAN-based application to perform **escrow** services...

< removed unnecessary information >

Claims:

Apparatus for escrow transactions, comprising: a computer based automation system, having components providing **implementation** , **management** , and tracking of escrow transactions, wherein data for **implementing** , **managing** , and tracking the escrow transactions is accessible for specific parties to said escrow transactions...

...is: 1. Apparatus for escrow transactions, comprising: a computer based automation system, having components providing **implementation** , **management** , and tracking of escrow transactions, wherein data for **implementing** , **managing** , and tracking the escrow transactions is accessible for specific parties to said escrow transactions...

...a computer based automation system, and system components associated with said system, said components providing **implementation** , **management** , tracking, and closing of said escrow transaction, wherein data and documentation for **implementing** , **managing** , tracking, and closing the escrow transaction are accessible via **on - line** communications...

...What is claimed is: 1. A **Web** -based client-server computer system for escrow office related processes of real estate title transfer, comprising: at least one client module associated with at least one client party for **initiating** an escrow process with at least one escrow company; and at least one server module...
